PLAST MILAN 2023

We are thrilled to announce the huge success of our rubber machinery at the recent trade show in Milan 2023. Our team worked incredibly hard leading up to the event to ensure that we showcased the very best of our products and services, and the response we received was overwhelmingly positive.

OUR PRODUCTS

Thanks to our innovative technology and superior design, our rubber machinery was met with great enthusiasm and interest from attendees at the event. From manufacturers to industry experts, everyone was impressed with the quality and capabilities of our products, and our team was proud to demonstrate the many benefits and features of our machinery.

Our injection machines are manufactured as standard in sizes from 1000-5000 kN, with injection volumes from 500cc and up. Our compression machines can be delivered in sizes from 500-100,000 kN.

All machine types can be supplied with a range of additional options, such as vacuum chambers, 2, 3, and 4 plate handling systems and sliding tables, to name just a few.

We can also supply as standard or later retrofitted a range of automation devices to support your production requirements.

We help you as a customer with everything from specifying the right functions to installing and providing ongoing service, support and spare parts.

THANK YOU

We want to extend a heartfelt thank you to everyone who stopped by our booth and showed interest in our rubber machinery. We are excited to continue to provide our customers with the best possible products and services, and we look forward to seeing you all again at future events.
